Ephemerides K. 756 b. 4

Merlinus Liberatus.

BEING AN

ALMANACK

For the Year of our Redemption,

1 7 6 9.

Being the firſt after *Biſſextile*, or *Leap Year*;

And from the Creation of the World, according to the beſt Hiſtory, 5718,

And the 80th of our Deliverance by K. *William* from Popery, and Arbitrary Government;

But the 74th from the

Horrid, Popiſh, High-Church, Jacobite Plot.

Wherein is contained all Things fitting and uſeful for ſuch a Work, as an Ephemeris of the daily Motions of the Planets, with their various Configurations, Aſpects, Conjunctions, Lunations, Eclipſes, Aſtronomical, Aſtrological, Meteorological Obſervations, the Riſing and Setting of the Sun, Moon, Planets, and fixed Stars, illuſtrated with Tables of the Tides, Terms, and daily Equation of Clocks, Length and Break, Increaſe and Decreaſe of Days, Semidiurnal and Seminocturnal Arches for ſeveral Latitudes, a Chronology, Remarks on the Diviſions of the Heavens, with particular Judgments of the viſible Eclipſes, with many other Things relating to the Truth of Aſtrology.

To which is prefixed,

The Proteſtant Remembrancer.

Calculated for the Meridian of *London*.

Whoſe { Longitude / Latitude } is { 24 / 51 } Degrees { 20 / 32 } Minutes.

By JOHN PARTRIDGE.

——— *Etiam Mortuus loquitur.*

LONDON: Printed by *J. HARRISON*, for the Company of STATIONERS.

[Price Stitched Nine Pence.]

To the impartial Readers and true Sons of Art.

Veritas odium parit.

GENTLEMEN,

BY the great Mercy of Almighty God I am now come to write my aſtral Judgment on the Year of our Lord 1769, which I ſhall deduce from the Poſitions and Configurations of the Heavens and heavenly Bodies in their Tranſits and mutual Aſpects through the Year.

The learned *Butler* has proved by Scripture, by Reaſon, and by Experience too, that there is an Aſtrology in the Heavens, that Man, in this State of Corruption, may attain to a competent Knowledge therein; and, that the ſaid Knowledge may be acquired by legal Art and Honeſty, by hard Study and diligent Obſervation, without the leaſt Derogation from God or true Godlineſs.

The pious *Joſeph*, ſometime Lord Biſhop of *Norwich*, tells Aſtrologers, that while they have God and Nature for their Warrant they may walk ſafely. And *Calvin* calls the Art, the Alphabet of Divinity. So *Gerſon* tells us that Heaven is God's Inſtrument, whereby he governeth the Frame of this corruptible World. *Propterea*, ſaith he, *non eſt hoc negandum de Aſtrologiâ*, &c. wherefore it cannot be denied of Aſtrology, but that it is a noble and admirable Science, revealed firſt to *Adam* and his Poſterity. Divinity it refuſeth not, nor do we know how it ſhould, for the Works and Word of God interfere not with each other, there is no claſhing nor Contradiction, in reality, in them. Some Divines and Aſtrologers may diſagree, but Divinity and true Aſtrology will forever be Friends.

Petrus de Aliaco, in his Concordance of Aſtrology with Divinity, proveth, that Floods, Sects, Schiſms, and other notable Accidents, to be ſignified by the Heavens. And *Euſebius* attributeth ſo much to Aſtrology, as to acknowledge the Death of Kings, the Deſolation of Cities, Calms, and Storms, fair and foul Weather, to be ſignified by the Stars, and foreſeen by Aſtrologers.

Origen ſaith, that Heaven is like a Book laid open, containing all future Events written in thoſe glorious Characters the Stars. *Plato* affirms, we had our Eyes given us to obſerve the Stars, and our Reaſon to contemplate their Motions and Significations. And *Ovid* rhimes out his. *Os*

Os homini ſublime dedit Cœlumque tueri,
Juſſit, et erectos, ad Sidera tollere vultus.

God gave Man an upright Face, that he
Might View the Stars, and learn Aſtrology.

Thus you may ſee very learned Divines, Philoſophers, and Poets have devoutly vouched to the Influences of the Stars, and given their Suffrage for aſtral Predictions, nor can it be ſaid that Prognoſtications, deduced from evident Cauſes in Nature, were diſallowed in any well-governed Commonwealth, whether Heathen, Jewiſh, or Chriſtian, but in moſt of them permitted and encouraged, maugre the Malice of the moſt invidious Enemies to the Contrary, who envy an harmleſs Motto, *Aſtra regunt Homines, ſed regit Aſtra Deus.* The Stars rule Men, but God rules the Stars, telling us, that if God over-rules the Stars, then can there be no Certainty in aſtral Predictions; juſt as if we ſhould argue, that the Eye has no Power to ſee becauſe we may wink and ſhut out the Light; or Light no Power to illuminate becauſe it may be averted, as the Luminaries themſelves in an Eclipſe. But, though God can interpoſe his extraordinary Power (for the Heavens and Stars are his ordinary Inſtruments) and do Things beſide Nature, or contrary to it, yet ſeldom was he ever known to do ſo, and that upon extraordinary Occaſions, as in *Joſhua*'s Times, when he made the Sun and Moon ſtand ſtill; in *Hezekiah's*, when he made the Sun retrogade; and, at our Saviour's Paſſion, he cauſed the Sun to be eclipſed at a full Moon; which, according to the Courſe of Nature, can never be eclipſed but at a new Moon.

I could give as cogent Reaſons for the genethliacal Part, and as good Authority for it; which, God willing, in ſome future Numbers, I may relate.

The Heavens ſo framed are,
That they to all declare,
God's Glory to excel;
The Skies and Firmament,
Bright, clear, and permanent,
His handy Works do tell.

Day unto Day doth teach,
And of the Lord do preach,
His wondrous Works relating;
Night unto Night doth ſhow,
That every one might know,
His Wiſdom them creating.

PSALM xix.

A Table of the Moon's Age for every Day throughout the present Year 1769. Whereby, with the Help of the next general Tide-Table, the Time of High Water at all the Places above-mentioned in it are shewn by Inspection.

Days Month.	January.	February.	March.	April.	May.	June.	July.	August.	September.	October.	November.	December.

An Explanation of this and the following Table.

First find the Month in the Head of the Table, and the Day in the first Column on the left Hand, and in the Angle of Meeting you have the Day of the Moon's Age, with which enter the following Table, and find your said Number in the left Hand Column, and over against it in the other Columns is the Time of High Water at all the Places abovementioned, by Inspection.

Example. *January* the 27th, I find the Moon to be 20 Days old, and over-against 20 in the first Col. I find 7 Hours 00 Min. in the second Col. 5h. 30' in the third, which is the Time of High Water at all those Places mentioned above in the 2d and 3d Columns. *Et sic de cæteris.*

A general Tide Table, shewing the Time of High Water at all the Places herein mentioned, *viz.*

A Table of Terms and Returns, for the Year of our Lord 1769.

Hilary Term begins *Jan.* 23, ends *Feb.* 12.

Returns or Eſſoign Days.		Exc.	Ret.	App.	W. D.
In eight Days of St. *Hilary*,	*Jan.* 23	21	22	23	*Monday*
From the Day of St. *Hilary* in 15 Days,	27	28	29	30	*Monday*
On the Morrow of Purif. of bl. V. *Mary*,	*Feb.* 3	4	5	6	*Monday*
In eight Days of the Purif. of bl. V. *Mary*,	9	10	11	13	*Monday*

Eaſter Term begins *April* 12, ends *May* 8.

From the Day of *Eaſter* in 15 Days,	*April* 9	10	11	12	*Wedneſ.*
From the Day of *Eaſter* in 3 Weeks,	16	17	18	19	*Wedneſ.*
From the Day of *Eaſter* in 1 Month,	23	24	25	26	*Wedneſ.*
From the Day of *Eaſter* in 5 Weeks,	30	*May* 1	2	3	*Wedneſ.*
On the Morrow of the Aſcenſion,	*May* 5	6	7	8	*Monday*

Trinity Term begins *May* 26, ends *June* 14.

On the Morrow of the holy *Trinity*,	*May* 22	23	24	26	*Friday.*
In eight Days of the holy *Trinity*.	28	29	30	31	*Wedneſ.*
From the Day of holy *Trinity* in 15 Days,	*June* 4	5	6	7	*Wedneſ.*
From the Day of holy *Trinity* in 3 Weeks,	11	12	13	14	*Wedneſ.*

Michaelmas Term begins *Nov.* 6, ends *Nov.* 28.

On the Morrow of *All Souls*,	*Nov.* 3	4	5	6	*Monday*
On the Morrow of St *Martin*,	12	13	14	15	*Wedneſ.*
In eight Days of St. *Martin*,	18	19	20	21	*Tueſday*
In fifteen Days of St. *Martin*,	25	26	27	28	*Tueſday*

N. B. No Sittings in *Weſtminſter-Hall* on *Aſcenſion*-Day, *Midſummer*-Day, and the 2d of *February*.

The *Exchequer* opens eight Days before any Term begins, except *Trinity*, before which it opens but four Days.

Note, That the firſt and laſt Days of every Term are the firſt and laſt Days of Appearance.

Would Men be juſt, on Terms we need not ſtand.
But live in Love and Peace throughout the Land;
For People are with Law-tricks ſo beſet,
The Suit proves worſe than loſing of the Debt.
Hang't, hang't, refer the Cauſe, and ceaſe your Fury,
Two Friends may do as well as Judge and Jury.

January hath XXXI Days.

The Rudiments of Aſtronomy put into plain Rhymes,
Beginning with the Conſtellations of the fixed Stars.

The Army of the ſtarry Sky
Declares the Glory of God moſt High.
Seen and perceived of all Nations,
In eight and forty Conſtellations.

First, near unto the northern Pole,
The Dragon and two Bears do roll,
Whose hinder Parts and tails contain,
The lesser and the greater wain,
The Hair, the Bear-ward, and the crown,
And then comes Hercules kneeling down.

Observations.

From the square of Mars and Mercury, and the other concommitant aspects of this month, we may fear that we in England are not free from the designs of hot-spirited persons, who labour much to set us all in a flame and confusion. many scandulous lying pamphlets are now, or near this time, sent abroad, and some eminent gownmen, whether ecclesiastical or civil, may now expect to be calumniated and most falsely ridiculed. Violent persons of contrary judgments would be prevalent, but suddenly, when least expected, these stub born agents meet with unexpected obstruction.

March hath XXXI Days.

August hath XXXI Days.

Above the little Dog doth flame,
For whom the Latins had no Name.
Long Hidra on her Tail below,
Carries the Pitcher and the Crow.
The Centaur holds the Wolf by the Heel.
The Alter, and also Ixion's Wheel.

October hath XXXI Days.

Twelve Jupiter, and Mars in twain
Sets forward and comes round again:
Then in one Year the Sun displays
Three hundred sixty, and five Days,
And near a Quarter, which in four
Encompassings makes one Day more.

Observations.

After all the Commotions that have of late been propagated, God seems pleased we should, at last, arrive to a Harbour of Content; and *Great Britain* in particular will, we hope, enjoy this precious Jewel for a Season: But the Rays of Mars and the Sun, with the Rays of Saturn to Mars and the Sun, seem to imbitter the Harmony, and shews the World is a Lottery, where a Man may be made or undone in a Moment. Merchants will have Losses at Sea by Storms, and many Disturbances in the Councils and Transactions of these present Times.

November hath XXX Days.

Between the Sun and us there fly
Fair Venus and ſwift Mercury;
Theſe always near the Sun we find,
Not far before, nor far behind:
The Moon's the loweſt, who in ſeven
And twenty Days, goes round the Heaven,
And above two Days more doth run,
Before ſhe overtakes the Sun.

Obſervations.

Jucunditas Cordis eſt vitæ hominis

The 5th of this Month, 1605, was the Popiſh Powder Plot, which by true Proteſtants ought never to be forgot.

The 7th of this Month, 1745. was born the hopeful Duke of *Cumberland*, 4th Son of her Royal Highneſs the Princeſs *Dowager* of *Wales*.

The 25th of this Month 1743. was born the hopeful *Duke* of *Glouceſter*, third Son of her Royal Highneſs the Princeſs *Dowager* of *Wales*.

And on the 30th 1719, was born her Royal Highneſs the Princeſs *Dowager* of *Wales*

December hath XXXI Days.

So twenty nine and an half in all
Do make a Month ſynodical,
Theſe Planets make their Courſe to th' Eaſt,
Though they be faſter hurled Weſt;
And ſix Degrees they ſome may ſtray,
Beſides the Sun's ecliptic Way.
Of theſe more, God willing, in my next.

1					21	12	10 9	2 30	6A49	The Aspects of this Month seem healthy. I hope Things will go on well, and may they prosper that wish well to us. Now Christmas draws near, I hope those who abound with Plenty, will take Care to feast the Poor, remembering they are Stewards, and must one Day give an Account of their Stewardship. I shall end my Observations with God preserve our gracious Sovereign King *George*, and grant him a long & glorious Reign here, and at last crown him with eternal Happiness in the World to come, and let us all say, Amen.

N. B. In the Kalendar Part you will find the Planets Southing inſerted to ſeveral Days in each Month; and by this Table you may eaſily find their Riſing and Setting: Firſt find the Longitude for the Day propoſed, with which enter this Table, and take out the Semidiurnal Arch thereof, which being added to the Time of Southing, gives the Setting; but ſubſtracted the Riſing.

Of the Eclipſes for the Year, 1769.

FIVE times this year will the two great lamps of heaven be eclipſed; namely, three times the Sun, and twice the Moon, which will happen in the following order:

The firſt is an inviſible and partial eclipſe of the Sun upon Sunday the 8th of January, about three o'clock in the morning.

The ſecond is alſo a partial but viſible eclipſe of the glorious body the Sun, or rather the earth, on Sunday the 4th of June, in the morning, as more clearly appears from the following calculation for the meridian of London, and may tolerably ſerve the whole kingdom of Great Britain and Ireland.

	London h ′ ″	
The eclipſe begins	6 48 11	In the morning.
Middle of the eclipſe	7 38 0	
End of the eclipſe	8 3 11	
Total Duration	1 15 0	Apparent time.
Digits eclipſed	6 5 oN	

The third will be of the Moon, and happens on the 19th day of June, at half an hour paſt eight o'clock in the morning, and conſequently inviſible to our iſle of Great Britain.

The fourth is another ſolar one, and happens on the 28th of November, at half an hour paſt eight o'clock in the morning, but it will be inviſible to us alſo.

The fifth and laſt is a partial eclipſe of the Moon, and viſible, if clouds interpoſe not, to us in our iſland; it happens on Wedneſday the 13th of December, according to the following calculations:

	London h ′ ″	Edinburgh h ′ ″	
The beginning	4 52 15	4 39 2	In the morning.
Middle of the eclipſe	6 23 8	6 9 55	
Ecliptic ☽	6 28 58	6 15 45	
End of the eclipſe	7 54 1	7 40 48	App. time
Duration	3 1 46	3 1 46	
Digits eclipſed	9 18 00	9 18 00N	

Theſe

Theſe calculations are done by the ſame perſon they were done by the laſt year, viz. Mr. H. Andrews, of Royſton, in Herts. Philomath, who very frankly ſent me the calculations, for which I gave him my humble thanks, he tells me they are computed from the tables of the celebrated Mr. Clairent, as likewiſe the ſame as I printed laſt year, and he ſays they are not to be equalled for exactneſs, but they are difficult to calculate from. He has made no leſs than twenty-two equations in finding the Moon's place. He tells me his ſolar tables, are no worſe than thoſe of Mr. Tobias Mayer, who verified every element thereof by his own obſervations. And therefore, at his deſire, I have expoſed them to the view of the curious aſtronomer. I know many of my friendly readers expect I ſhould, according to cuſtom, give them my judgment of the influences of the eclipſes this year in an aſtrological way. And, indeed, I am as willing to do it as they are to expect it from me. Aſtrology is a moſt excellent and laudable ſcience, though at preſent it ſeems to ſuffer a ſmall deliquium. It is not, it cannot be totally obſecured, *Magna eſt veritas, et prævalebit.* The learned are ſo much engaged in the improvement of aſtronomy, ſince the great Sir Iſaac Newton has ſhewn them its beauties, that they ſeem quite to neglect this more important branch of the cœleſtial ſcience, viz aſtrology, when it is to as little purpoſe for a man to know that there are ſtars, and not be acquainted with their influences, as it is for a phyſician to know the names and external forms of drugs and plants; and yet be utterly ignorant of their virtues and uſes. Of ſo little uſe is aſtronomy without aſtrology, ſo erroneous, ſo partial are men in their choice of things, that they prefer the ſhell to the kernel, and believe the body to be more rich and worthy, than the ſoul that animates and invigorates it. But, it is neceſſary, aſtronomy attain to all the perfections it can, it will one time or other contribute to the reſuſcitation of aſtrology. Having premiſed thus much, I ſhall proceed to give my opinion of the effects of the eclipſes; but the three inviſible eclipſes I ſhall paſs over in ſilence, well knowing that inviſible eclipſes have neither good nor bad effects. The firſt viſible eclipſe is of the greater luminary, the Sun, on the 4th of June, in the morning; and the other is of the Moon, on the 13th of December, in the morning,

morning, according to the former calculations. They are both celebrated in the ſign Gemini, near to the Hyades; and the conſtellation of Orion being ſtars of the nature of Saturn, Jupiter, Mars and Mercury; and Mercury, being chief ruler of the eclipſes, and not impeded either by combuſtion, retrogradation, or any male aſpect of the infortunes, but in the lunar is conjoined with Jupiter in his own domal dignities, and is alſo ſwift in motion, from hence we conclude there will be more than ordinary councils in the ſtage of the world, in moſt or all of the courts of the kings, princes, and potentates of Europe, in general. We hope we may have good effects to promote peace and tranquility, and the advancement of ſome deſerving men to honour. With the augmentation of thoſe things that are neceſſary for human ſubſiſtence; the common people will be very induſtrious and ſucceſsful in their vocations and callings; the merchants and marriners fortunate, the agents and ambaſſadors diligent and mindful of their maſter's buſineſs; the fleets will come home well cargoed, the barns, ſtorehouſes filled, and and arts and ſciences advanced; and likewiſe many witty and uſeful inventions, tending both to profit and pleaſure advanced. The times are coming and not far off, wherein corn will be cheaper, and money more plentiful among tradeſmen! It is then the commonwealth proſpereth, the tradeſmen circulate money, clowns and miſers either hoard it up, or purchaſe lands, both which bring no good to the public, but makes hard times, breaks tradeſmen, and ſtarves the poor. For when corn and cattle are too dear, as they have been for ſome years paſt, then are the cornfactors and other victuallers ſo intent upon filling their bags, that they can afford nothing to the poor; nor even can the rich think of good houſekeeping, and the general part of mankind are much more miſerable than when things are cheap; but let all ſuch know that he is not rich that hath much, but he that hath enough, nor is he poor that hath but a little; but he that covets more, he to whom a little ſeems not enough, a great deal will ſeem but a little. And ſo much for the eclipſes.

A Poem,

PARTRIDGE, 1769.

A Poem, ſhewing the Folly of Factions and Diviſions in conteſted Elections.

FOOLISH and vain is that contentious ſtrife,
Which ſours and robs us of the ſweets of life.
What's that to us when ſides are up or down,
Who's in or out, or who's in favour grown;
Our rulers even what they think fit will do,
And care not how 'tis thought by me or you.
Is't not a jeſt to ſee a buſy fop
To leave his labour or neglect his ſhop;
To quarrel with his father or his ſon,
Deny his friend or his religion,
To get this man a vote, and t'other none.
To raiſe among his neighbourhood debate,
And fewds in counties and in towns create?
In times of chuſing members, every ſot
Believes the world depends upon his vote.
And nearer as election days approach'd
Will for a month together be debauch'd.
Whether the elected, or th'elector paid
The latter loſt his reckoning in his trade;
Yet ſurely he would ſit, and ſcarce afford
The courtly candidate a civil word,
Nor his own chapman, nor the counter board.
Proud of his temporary power he ſwells,
And tales of his prevailing intereſt tells.
But when the ſh'riff has taken the return,
He dwindles to a wretch below your ſcorn.
Then he who as a ſage, the choice would rule,
Returns to nature, and reſumes the fool.
What can be more prepoſterous than to ſee
Two friends about a ſtranger diſagree?
Or formal newsmongers, over tea reflect,
On this commander's heat, and that's neglect.
And ſots, in cellars, or in garrets bred,
Inſult, like Æſop's ſerpent's tail, the head.
How eaſy is it made, by fools of late,
To ſcribble out reflections on the ſtate?
And ſuch as are for other arts too dull
To be of politics, and parties full.
What reams of ſage remarks have been produce'd
And are not but for pipes and paſtry us'd.

Sure

Sure of all plagues, diviſion is the worſt,
And wretched is the land by faction curſt!
The joys of conqueſt by our ſtrifes we ſpoil,
And render fruitleſs our late hero's toil.
For fame we've fought, and freedom, while our foes,
More weaken'd by their arts, than by their blows;
They feed the flame of our inteſtine jars,
And deride our follies before we are aware:
Were we, as we ſhould be, in intereſt one,
True to ourſelves, and faithful to the throne.
The world were ours, and royal GEORGE would reign,
The ſovereign of the land as well as main.
He calls us to unite, he leads the way,
And we ſhall ne'er be bleſt till we obey,
And baniſh faction, that dire fiend, away.
Who, like a fury, does her malice vent,
And blazons every trivial diſcontent;
Adds daily fewel to each parties fire,
And, with deluded zeal, their hearts inſpire.
Rouze now, thou better genius of the land,
Inſpire all hearts, and every helping hand;
Inſpire each pen to write ſedition down,
Unite all hearts unto the church and crown.

Judicium Aſtrologicum, pro Anno 1769.

Being an Aſtrological Judgment for the Year 1769.

ONCE more by heaven's bounty I appear,
And have, with pains, ſurveyed the circling year:
Up to the ſtarry orbs my fancy flew,
Where at one glance the univerſe to view:
There all for which fond mortals toil and fight,
Seem'd leſſer than a molehill in my ſight.
From that bright ſeat, methought, I laugh'd aloud
At the vain labours of the buſy croud:
Whilſt ſome, by fierce ambition hurl'd,
Make it their only work to embroil the world.
Accept, I pray, ſuch cautions for your good,
As from heav'n's myſtick text are underſtood.
What's fit is told, and for the reſt my prayers
To him that over-rules ill-boding ſtars,
Shall be, that ills may be diverted from us,
And all repent. *So Lord have mercy upon us.*

I. *Of*

PARTRIDGE, 1769.

I. *Of the Winter Quarter.*

WHICH begins on Wedneſday the 21ſt of December, 1768, at 24 min. paſt 5, mane apparent time, when 19 degrees of Virgo is on the Medium Cœli, and 26 deg. of Scorpio aſcends the eaſtern angle. But within three days of the ſolſtice there happens an eclipſe of the Moon, both viſible and total, in the 3d deg. of Cancer, and the Moon applies to the body of Saturn, and he is poſited in the 2d, the Sun in the 7th, and Mars on the cuſp of the 12th; theſe are malevolent configurations, and ſhew that the commonalty are uneaſy, and general repining and complaint for want of trade; and the conſultations of theſe times are full of animoſities and differences; and were it not for the friendly aſpects of the Sun and Mars, and between the ſuperiors we might juſtly fear miſchief might enſue thereupon. But we hope the wiſdom of ſome grave perſons in council will much qualify the unruly paſſions of the times, and, by degrees, compoſe matters in debate, and reduce them again to good order. And now many notable councils in moſt parts of Europe will be held, to debate matters of more than ordinary concernment in every individual nation and kingdom, of which we may expect ample information in convenient time. I doubt not, but we in England remain in peace and tranquility, as loyal ſubjects ought to do. I pray God continue the ſame. But if there be any diſſatisfied ſpirits amongſt us, that will ſtill be uneaſy to themſelves in diſturbing the government; let them enjoy the merit of their deſerts. It is time is the touchſtone of truth, and we know that the advantage of time and opportunity leads humane actions, as it were by the hand, to their perfection. The weather this quarter ſhould be various, with much wet and ſnow, with weſterly winds, or ſouth-weſt, intermixed with cold, northerly blaſts. The diſeaſes incident to this quarter, are griping of the guts, dry coughs, ſcurvy, dropſy, ſore throats, convulſions in children, tumours in the legs and knees. And thus much upon the winter quarter, or tropical ſeaſon, which I ſhall conclude with theſe poetical lines:

Look

Look up, my friends! ſee how the planets reign;
What news from Tripoly, from Rome, from Spain?
When dares the Turks o'er Germany advance?
And who's the man muſt cruſh the pride of France!
But, huſh, with theſe things what have we to do?
Does the world ſtill go mad, — even let it go.

II. *Of the Spring Quarter.*

THE Spring Quarter commences on Monday, the 20th of March, 40 min. paſt 7 in the morning, apparent time, when 22 degrees of Capricorn is on the mid-heaven, and 21 deg. of Taurus aſcends. At this ingreſs I find no planet angular but Jupiter, and he poſited in the 7th; being lately in trine with the Sun and Mercury; and applying to Venus; this ſhews a good underſtanding between prince and people. The actions of this quarter begin with very fair pretences, and the people are now in expectation of very hopeful proceedings for the general advantage of the whole nation. And in my opinion here ſeems little or no contradictions at this ingreſs, in the great affairs of the public; but very mature councils are continued to the general ſatisfaction of all loyal perſons, and true bred Engliſhmen; but if ſome diſcontented hot-brained perſons will be venting the gall of their turbulent ſpirits, and thereby bring trouble upon their own heads, let ſuch know that the evil they think to drive away, by an indiſcreet revenge, will return upon them with intereſt. I judge we may rationally expect the actions of this quarter to be of great concernment in civil affairs; and now many deſerving perſons are encouraged, and have honour conferred upon them; others are generouſly rewarded. But, moreover, to conclude, I fear towards the latter end of this quarter many ſickneſſes, and thoſe more than ordinary, fevers of all ſorts, and ſome of them dangerous and violent, eſpecially among the aged perſons, who make their exit out of the world, and death now, in good earneſt, deſigns to feed upon dainties, and therefore, in all thy glory, *Memento mori.* I might ſpeak of more and other things, but ſhall ſhut up all in theſe lines of advice:

Let

Let us eſteem thoſe men that do oppoſe
Both foreign lions, and domeſtic foes.
Now is the time to ſhew ourſelves like men,
And loving, loyal ſubjects too, and then
May laurel wreaths, and never-failing bays
Still crown our heads, in theſe our happy days.

III. *Of the Summer Quarter.*

WHICH begins at ſuch time as the Sun enters the ſign Cancer, which, this year, happens on Wedneſday the 21ſt of June, at 2 min. paſt 6 in the morning, when 9 deg. of Aries is on the Medium Cœli, and 27 degrees of Cancer aſcends. The Sun, Saturn, and Mercury are in the 12th, Jupiter in the 5th, and Mars on the cuſp of the 2d; the Moon in the 6th, departing from the oppoſition of Saturn, and applying to the ſame aſpect of Mercury; from theſe aſpects, and others preceding and ſucceeding the ingreſs, I conclude that the world ſtands, as it were, amazed ſuſpecting of its own fall, for things of moment are not accompliſhed without long and ſerious conſideration; and an induſtrious diligence never makes too much haſte. If ſo let us content ourſelves with thoſe bleſſings we enjoy, though they fall into our mouths but like dew or rain by drops, ſince thoſe that greedily gape after a flood, may be choaked with an inundation In the greateſt ſtorm of ill ſucceſs in the world, in our general affairs, let us endeavour to carry fair and pleaſant weather in our faces, or a clear countenance in a cloudy brow. We know that common people judge of perſons or things by the event, and the thing called ſucceſs is the bawd to vulgar admiration. And ſo I conclude my obſervations with theſe lines:

Mankind one day ſerene and free appear,
The next they're clouded, ſullen, and ſevere.
New paſſions, new opinions ſtill excite,
And, what they like at noon, they leave at night.
They gain with labour what they quit with eaſe,
And health, for want of change, becomes diſeaſe.

IV. *Of the Autumnal Quarter.*

WHICH commences on Friday the 22d of September, at 26 min. paſt 7 in the evening, in which the Moon goes from the ſquare of the Sun to the ſame aſpect of Mars; it is a violent and active ingreſs; but as my book is at an end, I muſt leave the farther proſecution of this diſcourſe, God willing, till my next; and conclude my this year's taſk with theſe lines:

All creatures have their king, who bears the ſway,
The ſubject's duty ſtill is to obey.
Thus every common wealth, in every thing,
Do pay all due obedience to their king:
And why not we, as joyfully now ſing,
To pray God bleſs great GEORGE, our gracious king.

F I N I S.

*** At Royſton, in Herts, are taught the following, viz. Writing, in all the moſt uſual hands; Arithmetic through allit's different rules, both vulgar and decimal, duodecimal and logarithmetical, with it's application to trade and commerce. Menſuration, in all it's branches; alſo ſurveying gauging, dialling, caſmography, practical aſtronomy, the uſe of the globes, and maps, &c. &c. by H. Andrews Philomath.

*** Lands ſurveyed, divided and incloſed, and maps of the ſame correctly delineated, and timber and pollewood ſurveyed, valued and ſold, by Vincent Wing, of Pickworth, in the county of Rutland; and Thomas Wright, of Eaton, in the county of Leiceſterſhire, practitioners in the Mathematics.
